

This color reference guide is for a 6"x10.5" trim size. The purple box in this layout designates the live area or safe area to print within, meaning any images or type that you don't want cut off will need to be within this box (this includes page numbers and titles). The light green area is the safe margin, anything that prints in this area is subject to being cut off on press once the product trims. The small black lines represent the actual trim size of 6"x10.5" however, this may fluctuate depending on the press. Finally the red area represents your bleed area approx. .25" from trim is the amount of bleed we recommend.

-  = live area of 5.25"x 9.75"
-  = safe margin .375" from trim
-  = bleed of .25" outside of trim
